

# Senior Product Owner (B2B)

## Why Money Dashboard?

We first launched in 2010, with a small team in Edinburgh, passionate about making the often-confusing world of personal finance more open, transparent and accessible for everyone.

Today our mission remains the same: to help people from every walk of life be happier and more successful by mastering their money. We're on a mission to change millions of lives, and we do that both directly with our Money Dashboard consumer app, and indirectly through partnerships with other fintech innovators.

Are you passionate about our mission? Do you want to be part of the next big fintech success story?

## That's where the team comes in

*We hire the best people and let them get on with it*

A strong belief in what we do is what gets us out of bed in the morning. We believe less in job titles and more in organising ourselves with a common goal to get things done.

- We collaborate and seek input from others to do our best work
- We are accountable for our own acts and omissions, celebrate our wins and look for ways to improve our work, our product and ourselves
- We disrupt and we learn fast
- We focus on creating a culture that works for everyone and seek people who will help us challenge our own assumptions

## Are you ready for the challenge?

We are creating a role for a Product Owner to lead the Data Enrichment squad, which will benefit both the Money Dashboard app and B2B partners - more details at:

<https://categorisation.moneydashboard.com/>

We are looking for a motivated self-starter who is ready to take charge and make their mark by taking a high-level product vision and turning it into reality. Imagine being afforded the opportunity to run a start-up with zero personal risk. This is your chance. You'll be running your own squad that will create the future of finance. You will be supported and mentored by a senior leadership team who will nurture both your personal and professional development.

## Here's what our ideal Product Owner for Data Enrichment looks like:

- You will have a deep understand the Open Banking landscape

Job Reference: MDB-PO

- You have a proven track record as a product owner who has led teams to build and manage B2B products (ideally API services too) that customers love.
- You love working directly with engineers, designers and data scientists in a fast-paced environment
- You are well versed in agile development practices (scrum, retros, planning, design sprints etc)
- You know when to employ different approaches to product management, and can balance lean-style MVP experimental work with focused iteration.
- You adopt a customer-centric approach to product development
- You show initiative, by identifying and initiating new projects from a roadmap you have developed in collaboration across the organisation to help drive the quality of data across the organisation.
- You are a team player with an enthusiastic, positive can-do attitude with the gravitas to lead, inspire, influence and innovate
- You have a track record of developing and nurturing talent within teams
- You pride yourself on meeting deadlines and expect to work under pressure
- You have strong self-awareness with a high level of emotional intelligence and interpersonal skills
- You're a self-starter, tenacious and inquisitive – use initiative to identify opportunities and solve problems
- You're looking for more than just a paycheck. You share our vision of a more open and transparent financial landscape for all

### **Sound like you? Here's some of what you'll be doing:**

- Work with the executive team to report on key metrics about data enrichment in the firm and measure the team and respond to demand, incidents and the changing landscape of the dynamic FinTech industry
- Collaborate with the Money Dashboard app teams, the data asset management teams and our Categorisation Service teams, understand their differing priorities and focus and develop a roadmap that best services them.
- Developing a longer-term roadmap, whilst being laser focussed on short-term delivery (#now, #next, #future roadmap)
- Support your team to set clear goals and key results, learn and adjust course when needed
- Coordinate project kick-offs, check-ins, internal handoffs and final deliveries
- Lead the ideation, technical development, and launch of innovative product features
- Work hands-on with designers and engineers to implement and build new features
- Bring growth mindset - always looking to improve and contribute where necessary in a fast growing scale up environment
- Become an authority on the classification of open banking data to identify the purpose / reason for transactions and the merchants where transactions occur and

be instrumental in defining the gold standard for the FinTech industry engaging with external parties such as banks, other FinTechs and authoritative bodies to help define the wider use of Open Banking within the UK.

- Developing the longer-term B2B strategy

### **You'll be in good company**

You will be part of a newly created team of high achievers running your own squad. This will be a great opportunity to learn. You will have a high impact and play a key role in taking Money Dashboard to the next level and putting your mark on the Open Banking movement.

### **What we offer:**

- Competitive Salary
- Pension Contributions
- 33 days of holidays plus a hot day on the rare occasion it gets hotter than 22 degrees in Edinburgh!
- Fully flexible holidays (take the days whenever you want)
- Perkbox - think cheap cinema tickets, free coffees and mobile phone insurance
- The opportunity to learn, grow and progress your career
- Conferences and Events so you can learn from tech's brightest minds
- Free food after 7pm for late workers
- Extra day of holidays for each year of service.
- Staff lunch on Fridays
- Cycle to work scheme
- Your choice of tech kit
